ABOUT US

THE PLANTOLOGIST

My journey began within my family's business, led by my mother, a pioneer in the Foliage and Floral industry, nestled in Universal Studios' backlot. We attracted major clients from the Film Industry while my father played a pivotal role as Greensman in Central Florida, with me as his trusted assistant. Set work became my passion as I discovered the enchantment in each assignment, honing my craft with plants, a skill I carry today. Fast forward to 2023, my insatiable curiosity and pursuit of excellence persist in every project. Fortunate to have a profession I deeply cherish, I am committed to bringing your vision to life.
